1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1,12-15,31 ,37 drawn to nucleic acid encoding SEQ. ID No 5 and fragment thereof or host cell containing said nucleic acid and vaccine thereof and kit.

Group II, claim(s) 2, drawn to nucleic acid encoding SEQ. ID No 3.

Group III, claim(s) 3, drawn to nucleic acid encoding SEQ. ID No 1.

Group IV, claim(s) 4, drawn to nucleic acid encoding SEQ. ID No 7.

Group V, claim(s)5, drawn to nucleic acid encoding SEQ. ID No. 9 .

Group VI, claim(s) 6, drawn to nucleic acid encoding SEQ. ID No. 11.

Group VII, claim(s) 7, drawn to nucleic acid encoding SEQ. ID No. 13.

Group VIII, claim(s) 8, drawn to nucleic acid encoding SEQ. ID No. 15.

Group IX, claim(s) 9, drawn to nucleic acid encoding SEQ. ID No. 17.

Group X, claim(s) 10, drawn to nucleic acid of claim 10.

Group XI, claim(s) 11, drawn to nucleic acid of claim 11.

Group XII, claim 16,30,33,34,35 drawn to protein of claim 16 and vaccine thereof.

Group XIII, claim 17, drawn to protein of claim 17.

Group XIV, claim 18, drawn to protein of claim 18 .

Group XV, claim 19, drawn to protein of claim 19 .

Group XVI, claim 20, drawn to protein of claim 20 .

Group XVII, claim 21, drawn to protein of claim 21 .

Group XVIII, claim 22, drawn to protein of claim 22 .

Group XIX, claim 23, drawn to protein of claim 23 .

Group XX, claim 24, drawn to protein of claim 24 .

Group XXI, claim 25, drawn to protein of claim 25 .

Group XXII, claim 26, drawn to protein of claim 26 ,

Group XXIII, claim(s) 32, drawn to antibody vaccine.

Group XXIV, claim(s) 36 , drawn to a method of making a vaccine.

The inventions listed as Groups I-XXIV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons. The putative inventions lack the same or corresponding special technical features because several of the claimed proteins were known in the prior art (see Kesel et al., Discussion section). The amino acid sequence of said molecules is an inherent property of said proteins.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
